

Motor Vehicle Traffic Injuries Cattaraugus County Roadways 2014

The Concern

Motor Vehicle Traffic Injuries are a serious public health problem in Cattaraugus County.

They are the fourth leading cause of injury related deaths. Crashes are not only a significant cause of death, pain and suffering, but also an economic burden to Cattaraugus County. In 2014, the crashes on Cattaraugus County's roadways resulted in \$1.9 million in hospitalization and emergency department (ED) charges.

These crashes are not accidents! They are not random, uncontrollable acts of fate, but occur in predictable patterns, with recognizable risk factors and among identifiable populations. A crash-related injury is a predictable and preventable event!

Magnitude of the Crash Problem

- Every two months, because of a traffic-related crash on a Cattaraugus County road, an average of:
 - 3 people were hospitalized
 - 48 people were treated in an ED
- In 2014, crashes on Cattaraugus County roadways resulted in:
 - \$1.2 million in hospitalization charges
 - \$734.3 thousand in ED charges

Traumatic Brain Injuries (TBIs) can result from traffic related crashes and may result in the loss of independent function, requiring long-term care and increased lifelong expenses.

Crashes on Cattaraugus County roadways in 2014:

- ⇒ Unrestrained vehicle occupants were six times more likely to sustain a TBI than vehicle occupants that buckled-up!
- ⇒ Traffic Control Disregarded and Speed related crashes were associated with the highest risk of a TBI.

Risky Driving Behaviors Help to Identify Crash Patterns and Associated Risks

Vehicle occupants that did NOT USE SEAT BELTS or CHILD SAFETY SEATS were:

- ⇒ Seventeen times more likely to require hospitalization.
 - Resulted in average hospital charges over \$31,100 higher than those buckled up.
- ⇒ Six times more likely to be diagnosed with a TBI.
- ⇒ Fifteen times more likely to be diagnosed with a serious injury.

People involved in alcohol and speed related crashes:

- ⇒ Were more likely to have medically diagnosed serious injuries
 - Resulting in some of the highest hospitalization charges among those injured in a motor vehicle crash

In 2014, crashes on Cattaraugus County roadways resulted in \$1.9 million in hospital and ED charges for treatment of injuries

- ⇒ Average hospital charge = \$63,931
- ⇒ Average ED charge = \$2,535
- ⇒ Highest total hospital and ED charges were for:
 - Speed-Related
 - Passing/ Lane Violation
 - Alcohol-Related

In New York State 2 of every 100 people involved in an alcohol-related crash are seriously injured
