

# Motor Vehicle Traffic Injuries Delaware County Roadways 2007

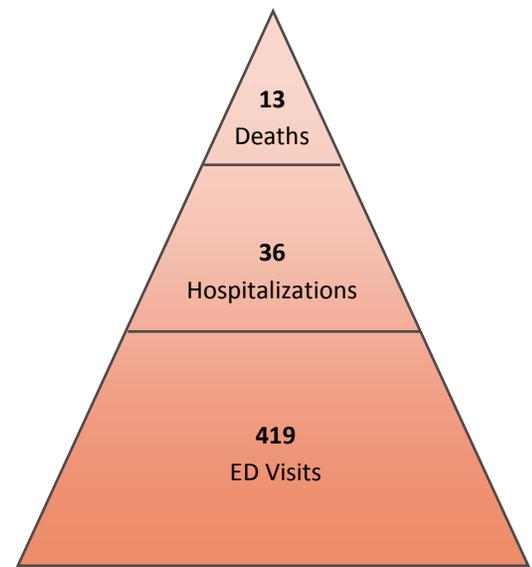

## The Concern

**Motor Vehicle Traffic Injuries are a serious public health problem in Delaware County, NY.** They are the leading cause of injury related deaths. Crashes are not only a significant cause of death, pain and suffering, but also an economic burden to Delaware County. In 2007, the crashes on Delaware County's roadways resulted in \$4 million in hospitalization and emergency department (ED) charges.

These crashes are not accidents! They are not random, uncontrollable acts of fate, but occur in predictable patterns, with recognizable risk factors and among identifiable populations. A crash-related injury is a predictable and preventable event!

## Magnitude of the Crash Problem

- Every **month**, because of a traffic-related crash on a Delaware County road, an average of:
  - 1 person died
  - 3 people were hospitalized
  - 35 people were treated in an ED
- In 2007, crashes on Delaware County roadways resulted in:
  - \$3.2 million in hospitalization charges
  - \$608.5 thousand in ED charges

**Motor Vehicle Traffic Crashes, 2007**  
Number of Deaths and Hospital Visits

**Traumatic Brain Injuries (TBIs)** can result from traffic related crashes and may result in the loss of full independent function, requiring long-term care and increased life-long expenses.

Crashes on Delaware County Roadways in 2007:

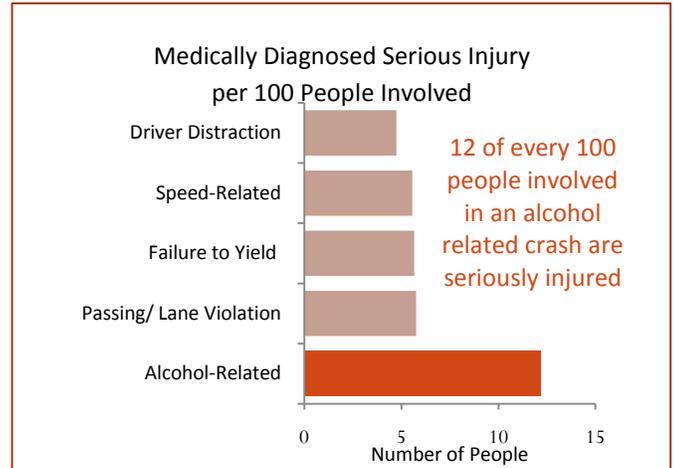

- ⇒ Unrestrained vehicle occupants were **four times more likely to sustain a TBI than vehicle occupants that buckled-up!**
- ⇒ Alcohol-related, following too closely, and distraction-related crashes were associated with the highest risk of a TBI.

**Vehicle occupants that did NOT USE SEAT BELTS or CHILD SAFETY SEATS were:**

- ⇒ Four times more likely to require hospitalization. <sup>(NYS data)</sup>
  - Resulted in average hospital charges over \$8,000 higher than those buckled up <sup>(NYS data)</sup>
- ⇒ Four times more likely to be diagnosed with a TBI. <sup>(Delaware County data)</sup>
- ⇒ Almost three times more likely to be diagnosed with a serious injury. <sup>(Delaware County data)</sup>

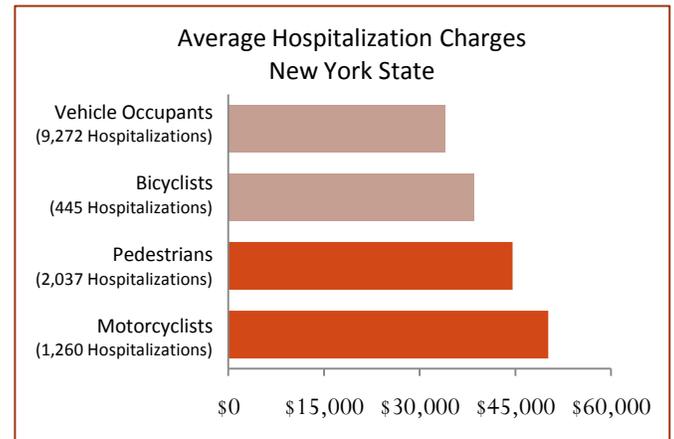

**People involved in alcohol related crashes:**

- ⇒ Were more likely to have medically diagnosed serious injuries
  - Resulting in some of the highest hospitalization charges among those injured in a motor vehicle crash <sup>(NYS data)</sup>

**In 2007, crashes on Delaware County roadways resulted in \$4 million in hospital and ED charges for treatment of injuries.**

- ⇒ Average hospital charge = \$90,155
- ⇒ Average ED charge = \$1,451
- ⇒ Highest average charges were for:
  - Motorcyclists <sup>(NYS data)</sup>
  - Pedestrians <sup>(NYS data)</sup>
- ⇒ Highest total Hospital and ED charges were for:
  - Speeding
  - Alcohol-Related

Reducing risky behaviors on the road can save lives and prevent injuries – making Delaware County a safer place to drive!
