

Motor Vehicle Traffic Injuries Erie County Roadways 2007

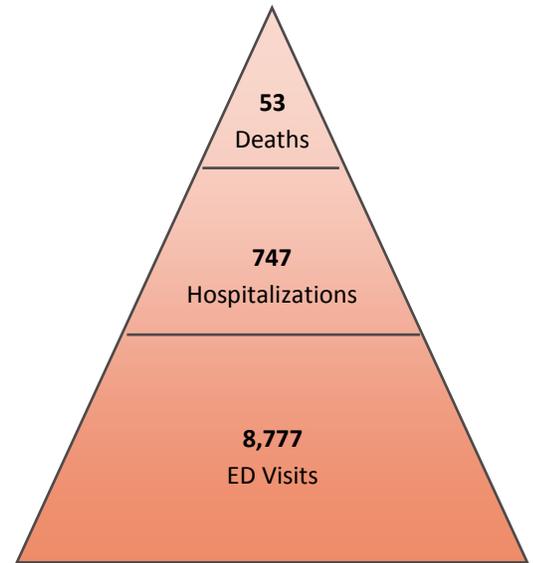

The Concern

Motor Vehicle Traffic Injuries are a serious public health problem in Erie County, NY. They are the 3rd leading cause of injury related deaths. Crashes are not only a significant cause of death, pain and suffering, but also an economic burden to Erie County. In 2007, the crashes on Erie County's roadways resulted in \$28 million in hospitalization and emergency department (ED) charges.

These crashes are not accidents! They are not random, uncontrollable acts of fate, but occur in predictable patterns, with recognizable risk factors and among identifiable populations. A crash-related injury is a predictable and preventable event!

Magnitude of the Crash Problem

- Every **week**, because of a traffic-related crash on an Erie County road, an average of:
 - 1 person died
 - 14 people were hospitalized
 - 169 people were treated in an ED
- In 2007, crashes on Erie County roadways resulted in:
 - \$19.6 million in hospitalization charges
 - **Approximately \$3 million was charged to publicly funded programs, such as Medicaid, Medicare, VA health care, and corrections.**
 - \$8.4 million in ED charges

Motor Vehicle Traffic Crashes, 2007
Number of Deaths and Hospital Visits

Traumatic Brain Injuries (TBIs) can result from traffic related crashes and may result in the loss of full independent function, requiring long-term care and increased life-long expenses.

Crashes on Erie County Roadways in 2007:

- ⇒ Unrestrained vehicle occupants were **four times more likely to sustain a TBI than vehicle occupants that buckled-up!**
- ⇒ Alcohol and speed related crashes were associated with the highest risk of a TBI.

Vehicle occupants that did NOT USE SEAT BELTS or CHILD SAFETY SEATS were:

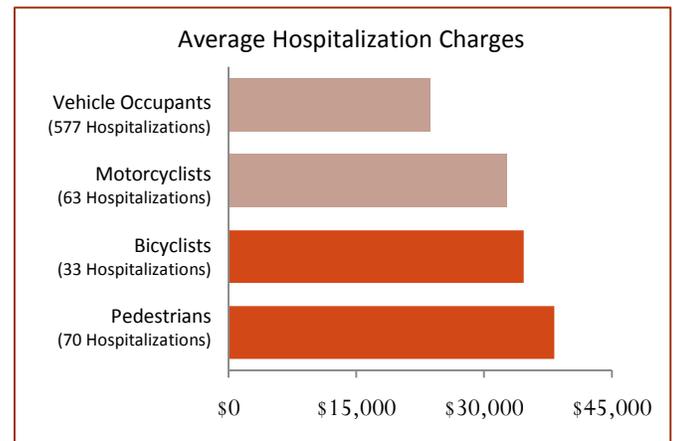

- ⇒ Five times more likely to require hospitalization.
 - Resulted in average hospital charges over \$10,000 higher than those buckled up
- ⇒ Four times more likely to be diagnosed with a TBI.
- ⇒ Almost four times more likely to be diagnosed with a serious injury.

People involved in alcohol and speed related crashes:

- ⇒ Were more likely to have medically diagnosed serious injuries
 - Resulting in some of the highest hospitalization charges among those injured in a motor vehicle crash

In 2007, crashes on Erie County roadways resulted in \$28 million in hospital and ED charges for treatment of injuries.

- ⇒ Average hospital charge = \$26,202
- ⇒ Average ED charge = \$960
- ⇒ Highest average charges were for:
 - Pedestrians
 - Bicyclists
- ⇒ Highest total Hospital and ED charges were for:
 - Distracted Driving
 - Speeding
 - Failure to Yield Right of Way

Reducing risky behaviors on the road can save lives and prevent injuries – making Erie County a safer place to drive!
