

Motor Vehicle Traffic Injuries Essex County Residents 2012-2014

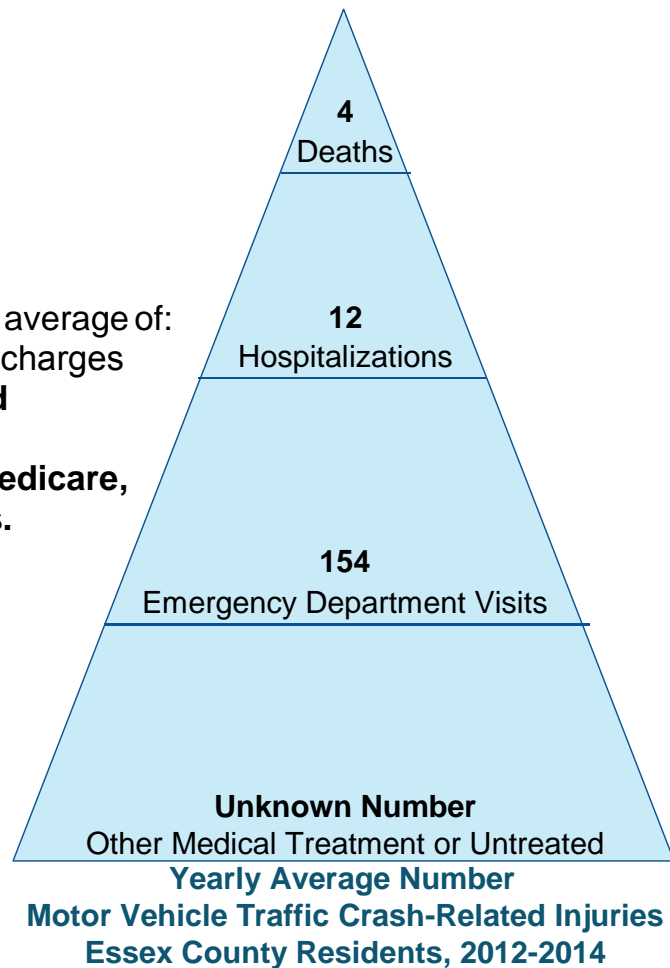

The Concern

Motor Vehicle Traffic Injuries are the 2nd leading cause of injury related death in Essex County. Traffic crash-related injuries are the 4th leading cause of injury related hospitalization and a leading cause of injury related emergency department (ED) visits in Essex County.

Traffic crash-related injuries are not accidents! They are not random, uncontrollable acts of fate, but occur in predictable patterns, with recognizable risk factors and among identifiable populations. A traffic crash-related injury is a predictable and preventable event!

Magnitude of the Crash Problem

- Every two **months**, because of a traffic crash, an average of:
 - 1 Essex County resident(s) died
 - 2 Essex County residents were hospitalized
 - 26 Essex County residents were treated in an ED
- Annually, traffic crashes resulted in an average of:
 - \$539.7 Thousand in hospitalization charges
 - **Approximately \$104.6 Thousand was charged to publicly funded programs, such as Medicaid, Medicare, VA health care, and corrections.**
 - \$426.2 Thousand in ED charges

Traumatic Brain Injuries (TBIs) can result from traffic crashes and may result in the loss of independent function, requiring long-term care, and increased in life-long expenses.

- Among New York State Residents that were hospitalized following a traffic crash **32% were diagnosed with a TBI.**
- Bicyclists and motorcyclists who wear helmets reduce their risk of a TBI!
- The risk of TBI can be reduced by wearing your seat belt!

Who is at Risk for Crash-Related Injuries?

- Although most crash victims in Essex County were vehicle occupants, **a higher percentage of motorcyclists were injured severely** enough to require hospitalization.

In Essex County:

- Although females have a higher rate of outpatient ED visits, males are more likely to have died or been hospitalized from a traffic crash.
- Traffic-related crash injuries occur in all age groups.

Essex County residents aged 15-19 had the highest rate of injuries treated in a hospital following a crash.
