

Motor Vehicle Traffic Injuries Fulton County Residents 2005-2007

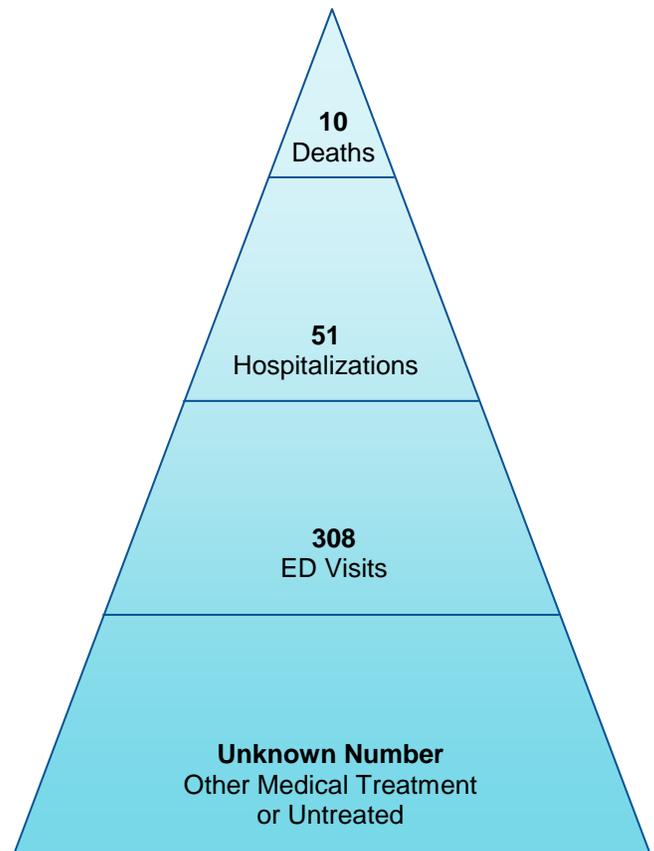

The Concern

Motor Vehicle Traffic Injuries are the leading cause of injury related death in Fulton County. Crash related injuries are the 2nd leading cause of injury related hospitalization and a leading cause for injury related emergency department (ED) visits in Fulton County.

Crash-related injuries are not accidents! They are not random, uncontrollable acts of fate, but occur in predictable patterns, with recognizable risk factors and among identifiable populations. A crash-related injury is a predictable and preventable event!

Magnitude of the Crash Problem

- Every **month**, because of a traffic-related crash, an average of:
 - 1 Fulton County resident died
 - 4 Fulton County residents were hospitalized
 - 26 Fulton County residents were treated in an ED
- Annually, traffic crashes resulted in an average of:
 - \$1.3 million in hospitalization charges
 - **Approximately \$112 thousand was charged to public funds programs**
 - \$480 thousand in ED charges
- 15% of hospitalized crash victims are released to another hospital, rehabilitation center or long term care, **incurring additional costs**

Fulton County Residents, 2005-2007

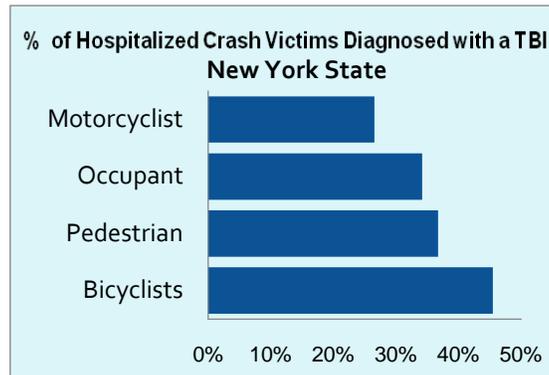

Traumatic Brain Injuries (TBIs) can result from traffic related crashes and may result in the loss of independent function, requiring long-term care, and increased life-long expenses.

⇒ Among Fulton County Residents that were hospitalized following a traffic crash **27.9% were diagnosed with a TBI.**

⇒ The risk of TBI can be reduced by wearing your seat belt!

⇒ Bicyclists and Motorcyclists who wear helmets reduce their risk of a TBI!

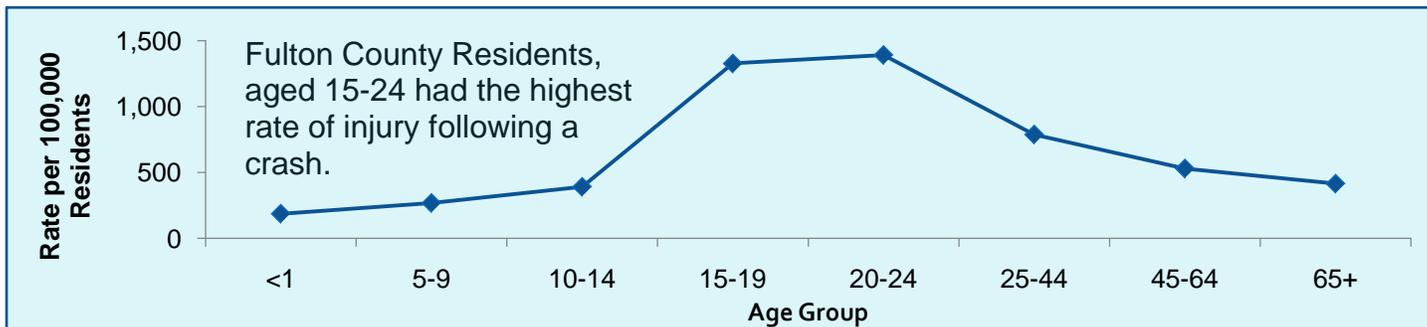

Who is at Risk for Crash-Related Injuries?

- Although most crash victims in New York State were vehicle occupants, **a higher percentage of bicyclists, pedestrians, and motorcyclists** were injured severely enough to require hospitalization.

In Fulton County:

- Although females have a higher rate of outpatient ED visits, males are more likely to have died or been hospitalized from a traffic crash.
- Traffic-related crash injuries occur in all age groups.

Treatment at a Hospital Following a Crash
