

Motor Vehicle Traffic Injuries Herkimer County Residents 2005-2007

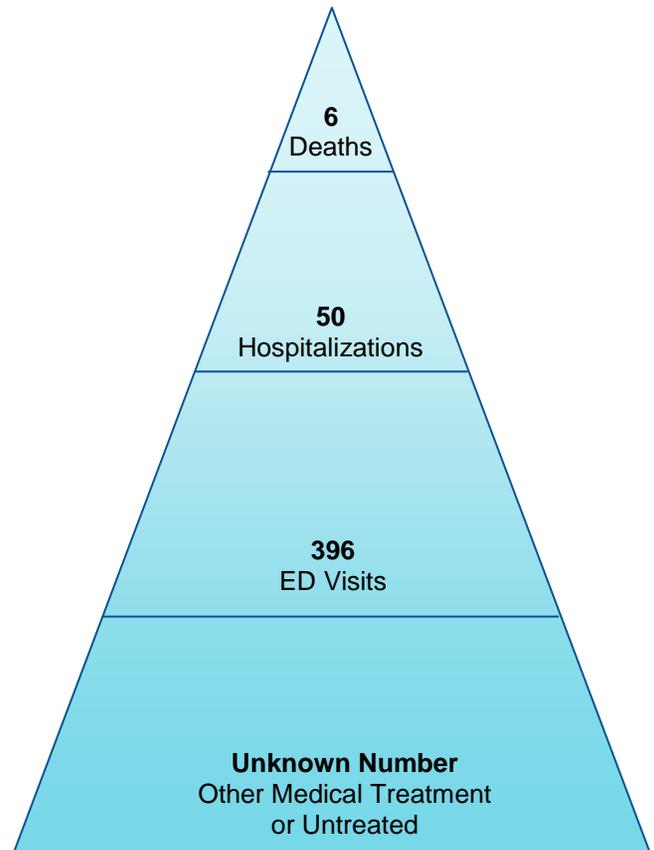

The Concern

Motor Vehicle Traffic Injuries are the 3rd leading cause of injury related death in Herkimer County. Crash related injuries are also the 2nd leading cause of injury related hospitalization and a leading cause for injury related emergency department (ED) visits in Herkimer County.

Crash-related injuries are not accidents! They are not random, uncontrollable acts of fate, but occur in predictable patterns, with recognizable risk factors and among identifiable populations. A crash-related injury is a predictable and preventable event!

Magnitude of the Crash Problem

- Every **two months**, because of a traffic-related crash, an average of:
 - 1 Herkimer County resident died
 - 8 Herkimer County residents were hospitalized
 - 66 Herkimer County residents were treated in an ED
- Annually, traffic crashes resulted in an average of:
 - \$1.1 million in hospitalization charges
 - **Approximately \$112 thousand was charged to publicly funded programs, such as Medicaid, Medicare, VA health care, and corrections.**
 - \$436.5 thousand in ED charges
- 23% of hospitalized crash victims are released to another hospital, rehabilitation center or long term care, **incurring additional costs**

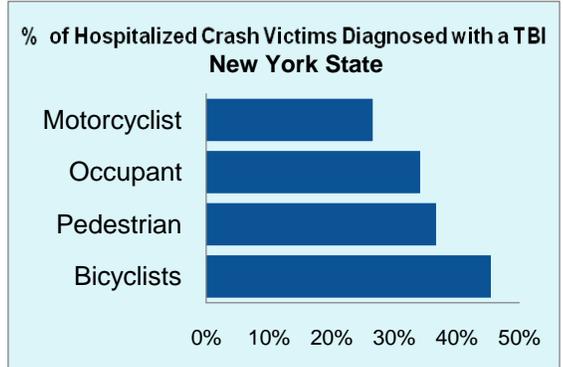

Yearly Average Number

Herkimer County Residents, 2005-2007

Traumatic Brain Injuries (TBIs) can result from traffic related crashes and may result in long-term problems with independent function, requiring long-term care, and increased life-long expenses.

- ⇒ Among Herkimer County Residents that were hospitalized following a traffic crash **21.9% were diagnosed with a TBI.**
- ⇒ The risk of TBI can be reduced by wearing your seat belt!
- ⇒ Bicyclists and Motorcyclists who wear helmets reduce their risk of a TBI!

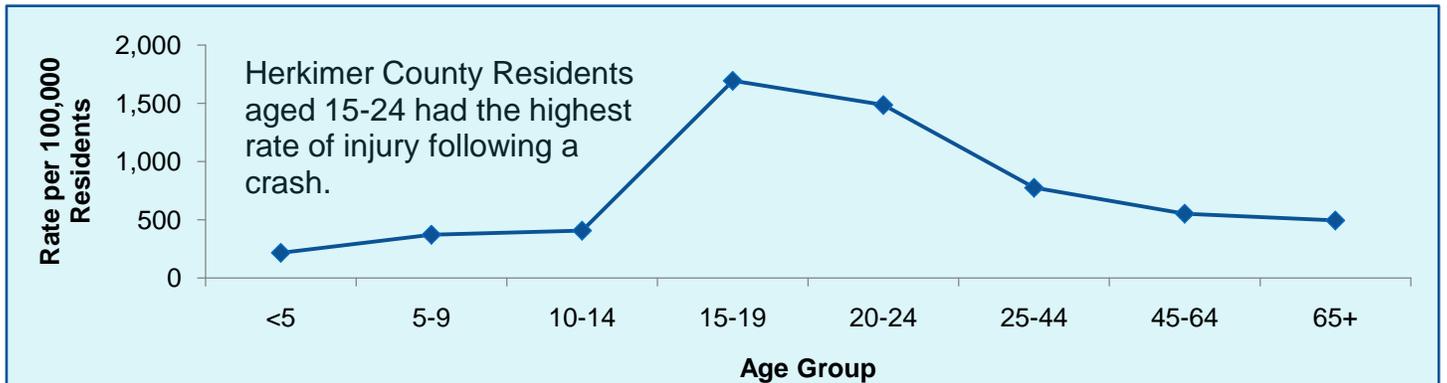

Who is at Risk for Crash-Related Injuries?

- Although most crash victims in New York State were vehicle occupants, **a higher percentage of bicyclists, pedestrians, and motorcyclists** were injured severely enough to require hospitalization.

In Herkimer County:

- Although females have a higher rate of outpatient ED visits, males are more likely to have died or been hospitalized from a traffic crash.
- Traffic-related crash injuries occur in all age groups.

Treatment at a Hospital Following a Crash
