

Motor Vehicle Traffic Injuries Livingston County Residents 2005-2007

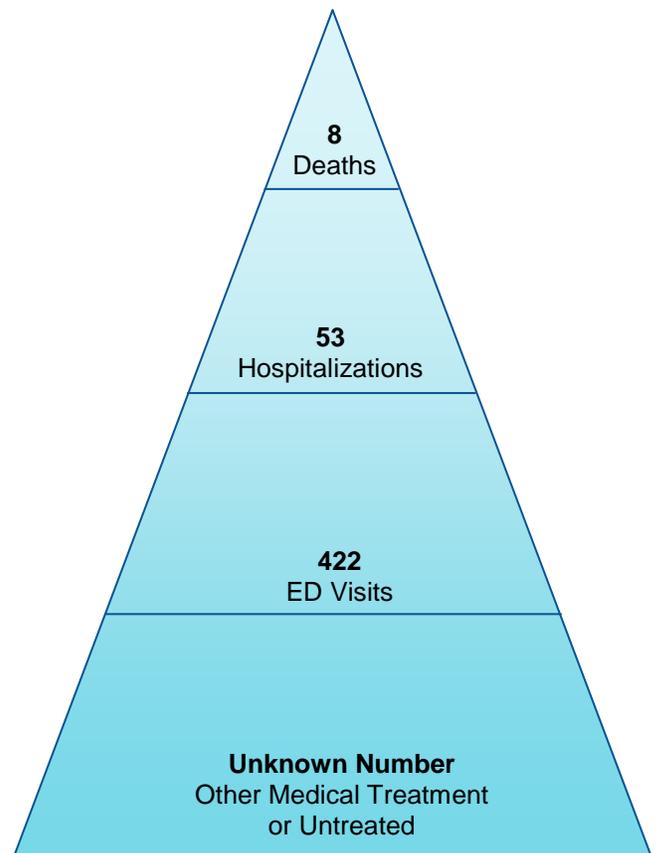

The Concern

Motor Vehicle Traffic Injuries are the leading cause of injury related death in Livingston County. Crash related injuries are the 2nd leading cause of injury related hospitalization and a leading cause for injury related emergency department (ED) visits in Livingston County.

Crash-related injuries are not accidents! They are not random, uncontrollable acts of fate, but occur in predictable patterns, with recognizable risk factors and among identifiable populations. A crash-related injury is a predictable and preventable event!

Magnitude of the Crash Problem

- Every **two months**, because of a traffic-related crash, an average of:
 - 1 Livingston County resident died
 - 9 Livingston County residents were hospitalized
 - 70 Livingston County residents were treated in an ED
- Annually, traffic crashes resulted in an average of:
 - \$1.6 million in hospitalization charges
 - **Approximately \$21 thousand was charged to publicly funded programs, such as Medicaid, Medicare, VA health care, and corrections.**
 - \$766.5 thousand in ED charges
- 19% of hospitalized crash victims are released to another hospital, rehabilitation center or long term care, **incurring additional costs**

Livingston County Residents, 2005-2007

Traumatic Brain Injuries (TBIs) can result from traffic related crashes and may result in long-term problems with independent function, requiring long-term care, and increased life-long expenses.

- ⇒ Among Livingston County Residents that were hospitalized following a traffic crash **23.1% were diagnosed with a TBI.**
- ⇒ The risk of TBI can be reduced by wearing your seat belt!
- ⇒ Bicyclists and Motorcyclists who wear helmets reduce their risk of a TBI!

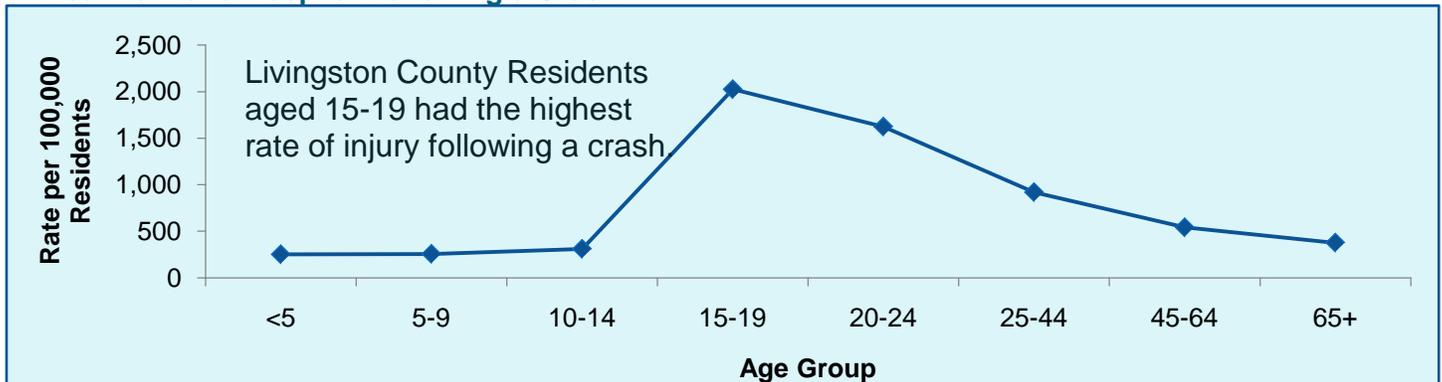

Who is at Risk for Crash-Related Injuries?

- Although most crash victims in New York State were vehicle occupants, **a higher percentage of bicyclists, pedestrians, and motorcyclists** were injured severely enough to require hospitalization.

In Livingston County:

- While females have a higher rate of outpatient ED visits and a slightly higher rate of hospitalizations, males have a slightly higher rate of death from traffic crashes.
- Traffic-related crash injuries occur in all age groups.

Treatment at a Hospital Following a Crash
