

# Motor Vehicle Traffic Injuries Madison County Residents 2005-2007

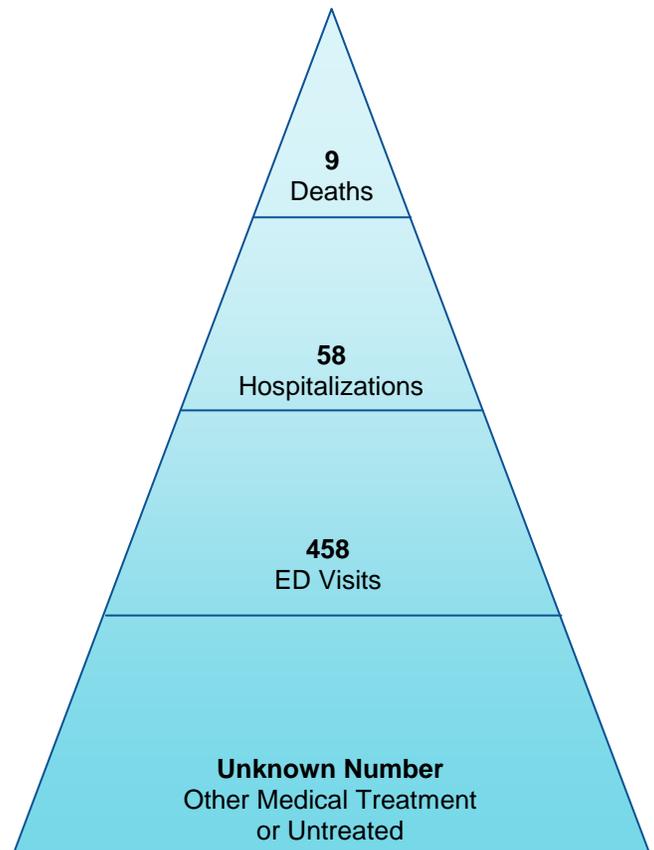

The Concern

**Motor Vehicle Traffic Injuries are the leading cause of injury related death in Madison County.** Crash related injuries are the 2<sup>nd</sup> leading cause of injury related hospitalization and a leading cause for injury related emergency department (ED) visits in Madison County.

Crash-related injuries are not accidents! They are not random, uncontrollable acts of fate, but occur in predictable patterns, with recognizable risk factors and among identifiable populations. A crash-related injury is a predictable and preventable event!

## Magnitude of the Crash Problem

- Every **month**, because of a traffic-related crash, an average of:
  - 1 Madison County resident died
  - 10 Madison County residents were hospitalized
  - 38 Madison County residents were treated in an ED
- Annually, traffic crashes resulted in an average of:
  - \$2.0 million in hospitalization charges
    - **Approximately \$58 thousand was charged to publicly funded programs, such as Medicaid, Medicare, VA health care, and corrections.**
  - \$488.4 thousand in ED charges
- 25% of hospitalized crash victims are released to another hospital, rehabilitation center or long term care, **incurring additional costs**

Motor Vehicle Traffic Crash-Related Injuries  
Madison County Residents, 2005-2007

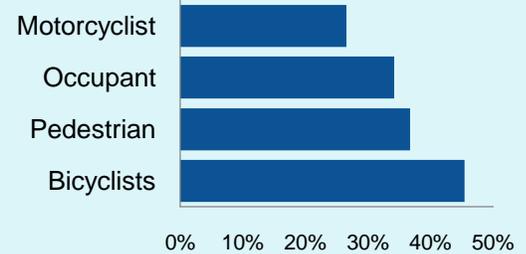

**Traumatic Brain Injuries (TBIs)** can result from traffic related crashes and may result in the loss of independent function, requiring long-term care, and increased life-long expenses.

⇒ Among Madison County Residents that were hospitalized following a traffic crash **40.5% were diagnosed with a TBI**

⇒ The risk of TBI can be reduced by wearing your seat belt!

⇒ Bicyclists and Motorcyclists who wear helmets reduce their risk of a TBI!

% of Hospitalized Crash Victims Diagnosed with a TBI  
New York State Residents

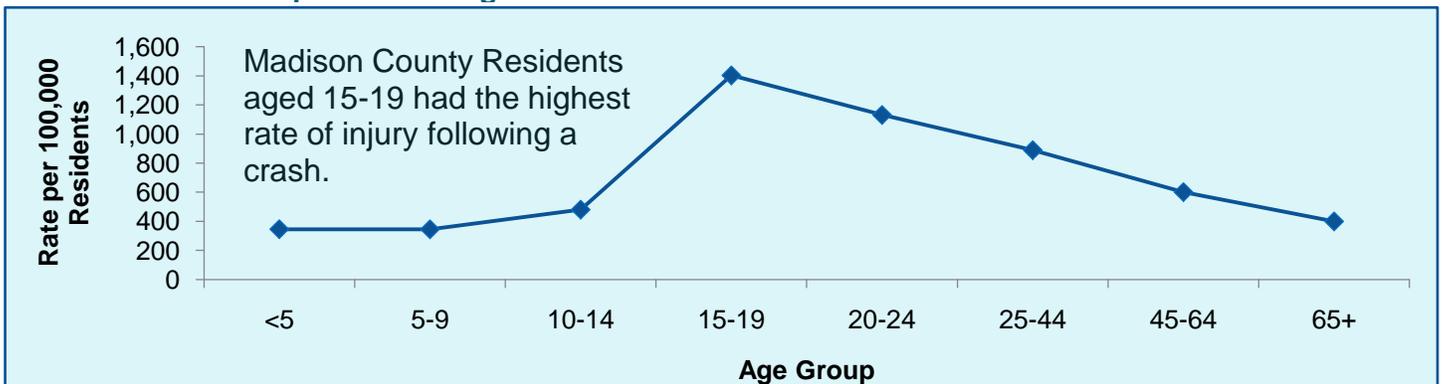

## Who is at Risk for Crash-Related Injuries?

- Although most crash victims in New York State were vehicle occupants, **a higher percentage of bicyclists, pedestrians, and motorcyclists** were injured severely enough to require hospitalization.

In Madison County:

- Although females have a higher rate of outpatient ED visits, males are more likely to have died or been hospitalized from a traffic crash.
- Traffic-related crash injuries occur in all age groups.

### Treatment at a Hospital Following a Crash
