

Motor Vehicle Traffic Injuries New York County Residents 2012-2014

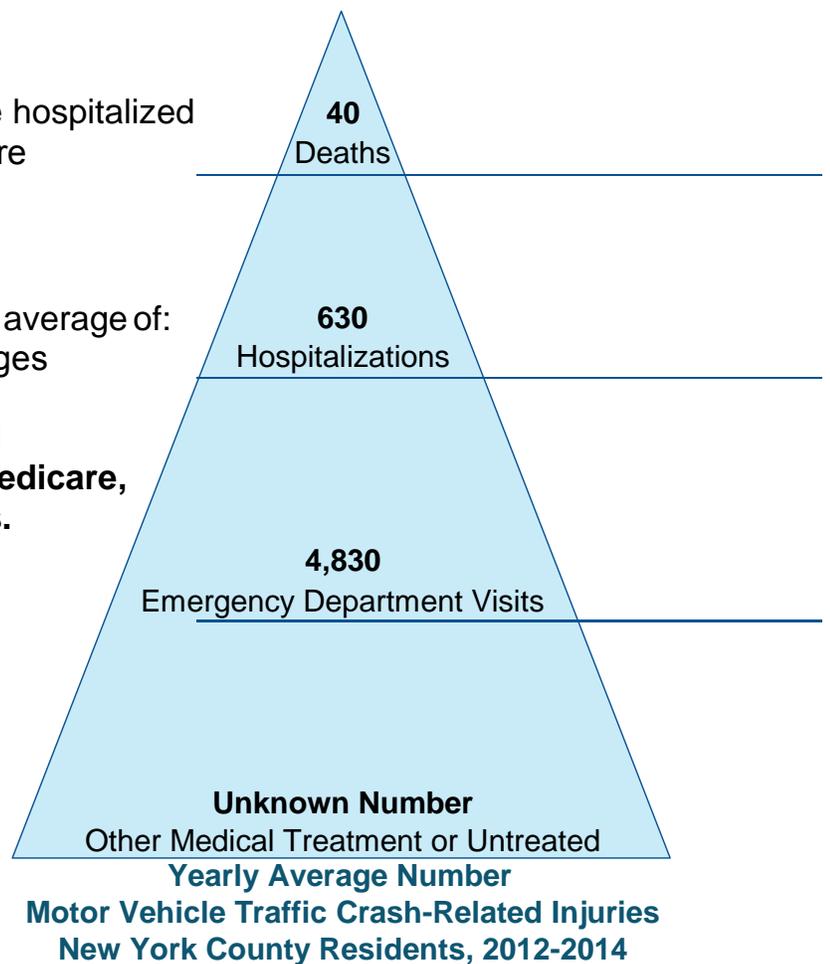

The Concern

Motor Vehicle Traffic Injuries are the 6th leading cause of injury related death in New York County. Traffic crash-related injuries are the 6th leading cause of injury related hospitalization and a leading cause of injury related emergency department (ED) visits in New York County.

Traffic crash-related injuries are not accidents! They are not random, uncontrollable acts of fate, but occur in predictable patterns, with recognizable risk factors and among identifiable populations. A traffic crash-related injury is a predictable and preventable event!

Magnitude of the Crash Problem

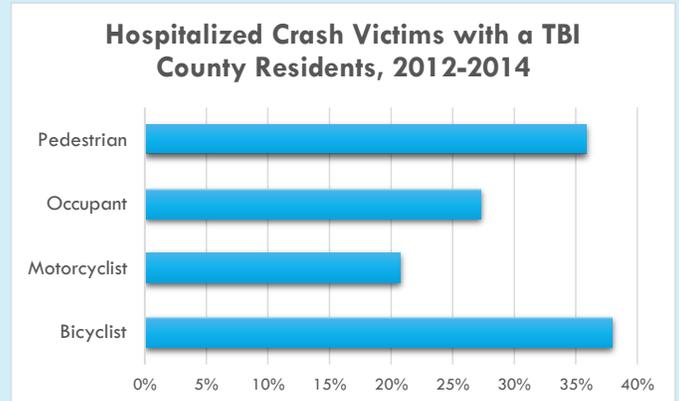

- Every **month**, because of a traffic crash, an average of:
 - 3 New York County resident(s) died
 - 53 New York County residents were hospitalized
 - 403 New York County residents were treated in an ED
- Annually, traffic crashes resulted in an average of:
 - \$37.5 Million in hospitalization charges
 - **Approximately \$6.5 Million was charged to publicly funded programs, such as Medicaid, Medicare, VA health care, and corrections.**
 - \$10.8 Million in ED charges
- 10% of hospitalized crash victims were released to another hospital, rehabilitation center or long-term care facility, **incurring additional costs.**

Traumatic Brain Injuries (TBIs) can result from traffic crashes and may result in the loss of independent function, requiring long-term care, and increased in life-long expenses.

- Among New York County Residents that were hospitalized following a traffic crash **31% were diagnosed with a TBI, with the highest rates among bicyclists.**
- Bicyclists and motorcyclists who wear helmets reduce their risk of a TBI!
- The risk of TBI can be reduced by wearing your seat belt!

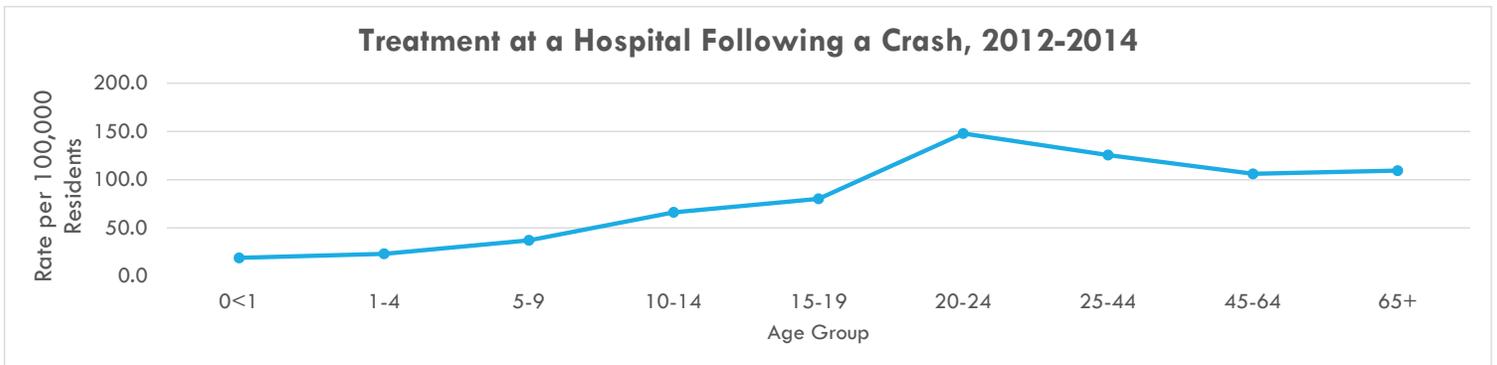

Who is at Risk for Crash-Related Injuries?

- Although most crash victims in New York County were vehicle occupants, **a higher percentage of bicyclists, pedestrians, and motorcyclists were injured severely enough to require hospitalization.**

In New York County:

- Males have a higher rate of hospitalizations and outpatient ED visits resulting from a traffic crash.
- Traffic-related crash injuries occur in all age groups.

New York County residents aged 20-24 had the highest rate of injuries treated in a hospital following a crash.
