## Motor Vehicle Traffic Injuries Queens County Residents 2012-2014

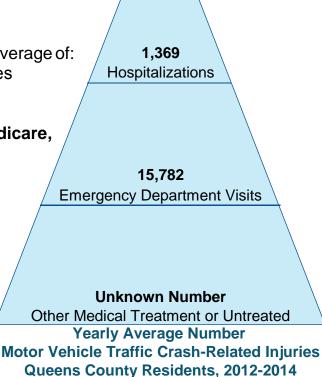

Motor Vehicle Traffic Injuries are the 4th leading cause of injury related death in Queens County. Traffic crash-related injuries are the 2nd leading cause of injury related hospitalization and the 3rd leading cause for injury related emergency department (ED) visits in Queens County.

Traffic crash-related injuries are not accidents! They are not random, uncontrollable acts of fate, but occur in predictable patterns, with recognizable risk factors and among identifiable populations. A traffic crash-related injury is a predictable and preventable event!

## Magnitude of the Crash Problem

- Every **month**, because of a traffic crash, an average of:
  - → 8 Queens County resident(s) died
  - → 114 Queens County residents were hospitalized
  - → 1,315 Queens County residents were treated in an ED
- Annually, traffic crashes resulted in an average of:
  - → \$70.8 Million in hospitalization charges
    - Approximately \$9.5 Million
      was charged to publicly funded
      programs, such as Medicaid, Medicare,
      VA health care, and corrections.
  - → \$35.5 Million in ED charges
- 8% of hospitalized crash victims were released to another hospital, rehabilitation center or long-term care facility, incurring additional costs.

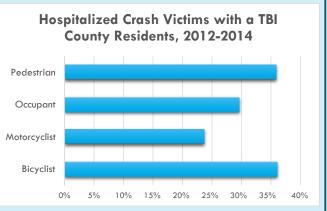

93

Deaths

**Traumatic Brain Injuries** (TBIs) can result from traffic crashes and may result in the loss of independent function, requiring long-term care, and increased in life-long expenses.

- → Among Queens County Residents that were hospitalized following a traffic crash 30% were diagnosed with a TBI, with more than a third of bicyclists sustaining a TBI.
- → Bicyclists and motorcyclists who wear helmets reduce their risk of a TBI!
- → The risk of TBI can be reduced by wearing your seat belt!

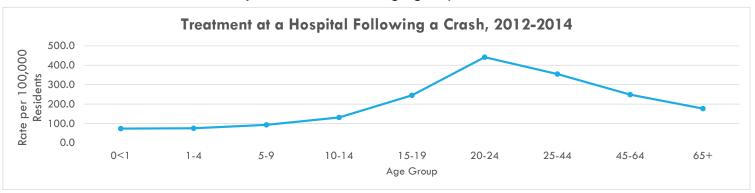

## Who is at Risk for Crash-Related Injuries?

• Although most crash victims in Queens County were vehicle occupants, a higher percentage of bicyclists, pedestrians, and motorcyclists were injured severely enough to require hospitalization.

## In Queens County:

- Males have a higher rate of hospitalizations and outpatient ED visits resulting from a traffic crash.
- Traffic-related crash injuries occur in all age groups.

Queens County residents aged 20-24 had the highest rate of injuries treated in a hospital following a crash.
