Motor Vehicle Traffic Injuries
Queens County Residents
2005-2007

Magnitude of the Crash Problem

- Every week, because of a traffic-related crash, an average of:
  → 2 Queens County residents died
  → 33 Queens County residents were hospitalized
  → 283 Queens County residents were treated in an ED
- Annually, traffic crashes resulted in an average of:
  → $55.2 million in hospitalization charges
    - Approximately $5 million was charged to publicly funded programs, such as Medicaid, Medicare, VA health care, and corrections.
  → $19.2 million in ED charges
- 15% of hospitalized crash victims are released to another hospital, rehabilitation center or long term care, incurring additional costs

Motor Vehicle Traffic Injuries are the 3rd leading cause of injury related death in Queens County. Crash related injuries are the 2nd leading cause of injury related hospitalization and injury related emergency department (ED) visits in Queens County.

Crash-related injuries are not accidents! They are not random, uncontrollable acts of fate, but occur in predictable patterns, with recognizable risk factors and among identifiable populations. A crash-related injury is a predictable and preventable event!
Traumatic Brain Injuries (TBIs) can result from traffic related crashes and may result in the loss of independent function, requiring long-term care, and increased life-long expenses.

⇒ Among Queens County Residents that were hospitalized following a traffic crash 31.7% were diagnosed with a TBI, with almost half of bicyclists sustaining a TBI.
⇒ The risk of TBI can be reduced by wearing your seat belt!
⇒ Bicyclists and Motorcyclists who wear helmets reduce their risk of a TBI!

Who is at Risk for Crash-Related Injuries?

- Although most crash victims in New York State were vehicle occupants, a higher percentage of bicyclists, pedestrians, and motorcyclists were injured severely enough to require hospitalization.

In Queens County:

- Males are more likely to have died, been hospitalized, or received outpatient treatment at an ED following a traffic crash.
- Traffic-related crash injuries occur in all age groups.

Treatment at a Hospital Following a Crash

Queens County Residents aged 20-24 had the highest rate of injury following a crash.
