

Motor Vehicle Traffic Injuries Richmond County Residents 2005-2007

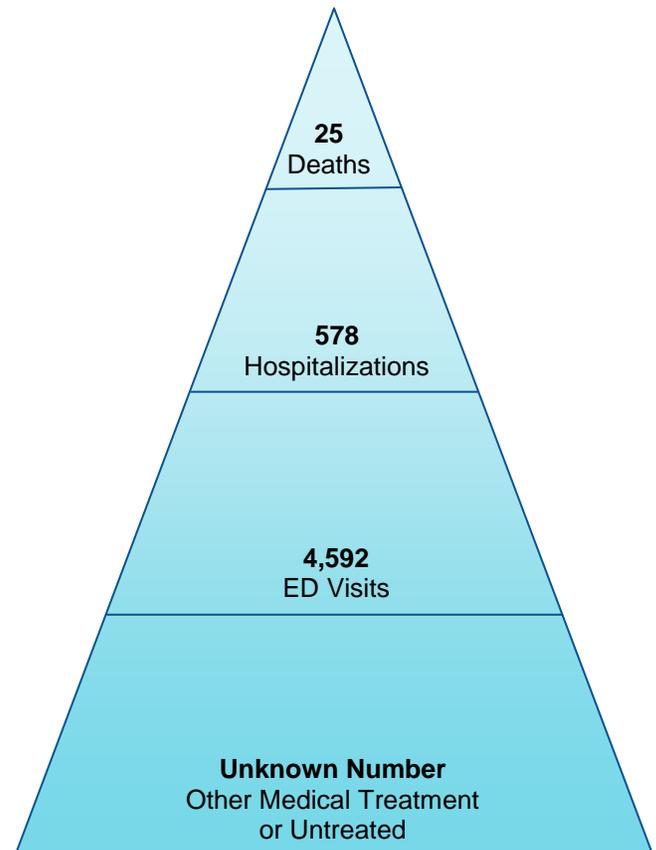

The Concern

Motor Vehicle Traffic Injuries are the 2nd leading cause of injury related death in Richmond County. Crash related injuries are also the 2nd leading cause of injury related hospitalization and are the 3rd leading cause of injury related emergency department (ED) visits in Richmond County.

Crash-related injuries are not accidents! They are not random, uncontrollable acts of fate, but occur in predictable patterns, with recognizable risk factors and among identifiable populations. A crash-related injury is a predictable and preventable event!

Magnitude of the Crash Problem

- Every **month**, because of a traffic-related crash, an average of:
 - 2 Richmond County residents died
 - 48 Richmond County residents were hospitalized
 - 383 Richmond County residents were treated in an ED
- Annually, traffic crashes resulted in an average of:
 - \$14.0 million in hospitalization charges
 - **More than \$1 million was charged to publicly funded programs, such as Medicaid, Medicare, VA health care, and corrections.**
 - \$4.7 million in ED charges
- 12% of hospitalized crash victims are released to another hospital, rehabilitation center or long term care, **incurring additional costs**

Richmond County Residents, 2005-2007

Traumatic Brain Injuries (TBIs) can result from traffic related crashes and may result in the loss of full independent function, requiring long-term care, and increased life-long expenses.

- ⇒ Among Richmond County Residents that were hospitalized following a traffic crash **25.7% were diagnosed with a TBI, with almost a third of pedestrians sustaining a TBI.**
- ⇒ The risk of TBI can be reduced by wearing your seat belt!
- ⇒ Bicyclists and Motorcyclists who wear helmets reduce their risk of a TBI!

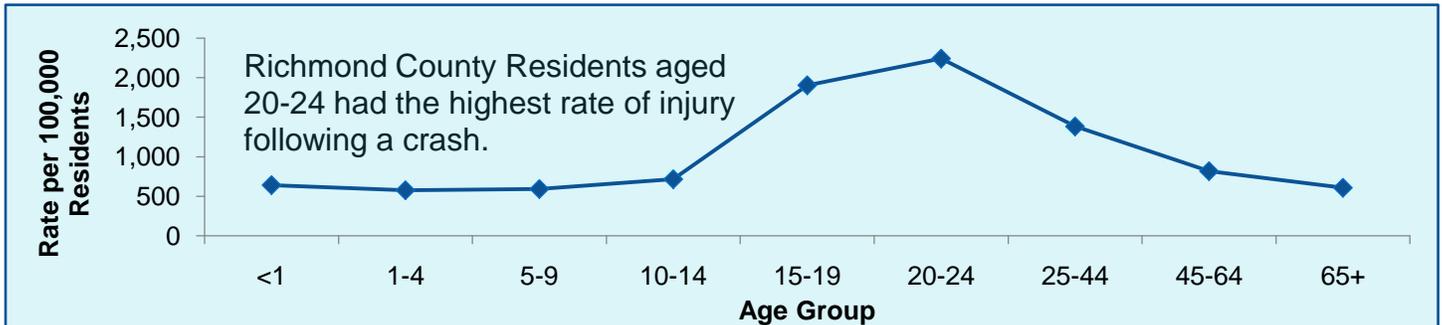

Who is at Risk for Crash-Related Injuries?

- Although most crash victims in New York State were vehicle occupants, **a higher percentage of bicyclists, pedestrians, and motorcyclists** were injured severely enough to require hospitalization.

In Richmond County:

- Although females have a higher rate of outpatient ED visits, males are more likely to have died, or been hospitalized following a traffic crash.
- Traffic-related crash injuries occur in all age groups.

Treatment at a Hospital Following a Crash
