

Motor Vehicle Traffic Injuries St. Lawrence County Roadways 2007

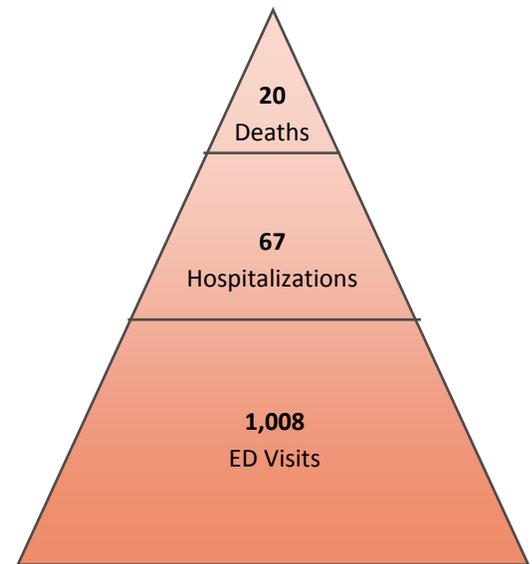

The Concern

Motor Vehicle Traffic Injuries are a serious public health problem in St. Lawrence County, NY. They are the leading cause of injury related deaths. Crashes are not only a significant cause of death, pain and suffering, but also an economic burden to St. Lawrence County. In 2007, the crashes on St. Lawrence County's roadways resulted in over \$2 million in hospitalization and emergency department (ED) charges.

These crashes are not accidents! They are not random, uncontrollable acts of fate, but occur in predictable patterns, with recognizable risk factors and among identifiable populations. A crash-related injury is a predictable and preventable event!

Magnitude of the Crash Problem

- Every **month**, because of a traffic-related crash on a St. Lawrence County road, an average of:
 - 2 people died
 - 6 people were hospitalized
 - 84 people were treated in an ED
- In 2007, crashes on St. Lawrence County roadways resulted in:
 - \$1.2 million in hospitalization charges
 - **Approximately \$100 thousand was charged to publicly funded programs, such as Medicaid, Medicare, VA health care, and corrections.**
 - \$1.2 million in ED charges

Motor Vehicle Traffic Crashes, 2007
Number of Deaths and Hospital Visits

Traumatic Brain Injuries (TBIs) can result from traffic related crashes and may result in the loss of full independent function, requiring long-term care and increased life-long expenses.

Crashes on St. Lawrence Roadways in 2007:

- ⇒ Unrestrained vehicle occupants were **five times more likely to sustain a TBI than vehicle occupants that buckled-up!**
- ⇒ Speed, traffic control disregarded, and alcohol related crashes were associated with the highest risk of a TBI.

Risky Driving Behaviors Help to Identify the Crash Patterns and Associated Risks

Vehicle occupants that did NOT USE SEAT BELTS or CHILD SAFETY SEATS were:

⇒ Six times more likely to require hospitalization.

→ Resulted in average hospital charges almost \$8,000 higher than those buckled up

⇒ Five times more likely to be diagnosed with a TBI.

⇒ Three times more likely to be diagnosed with a serious injury.

People involved in alcohol and speed related crashes:

⇒ Were more likely to have medically diagnosed serious injuries

→ Resulting in high hospital treatment charges among those injured in a motor vehicle crash

In 2007, crashes on St. Lawrence County roadways resulted in over **\$2 million** in hospital and ED charges for treatment of injuries.

⇒ Average hospital charge = \$17,231

⇒ Average ED charge = \$1,171

⇒ Highest average charges in NYS were for:

→ Motorcyclists

→ Pedestrians

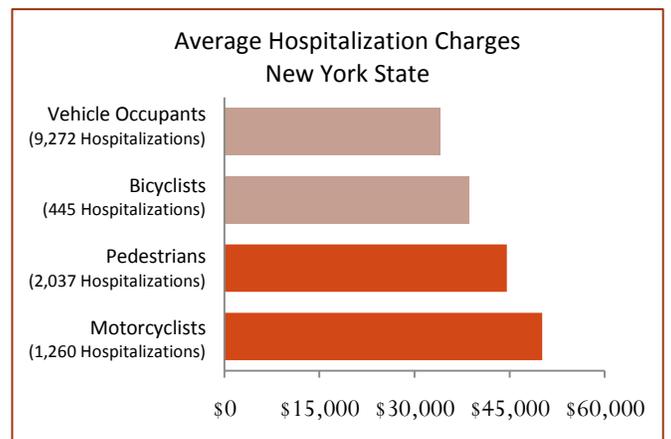

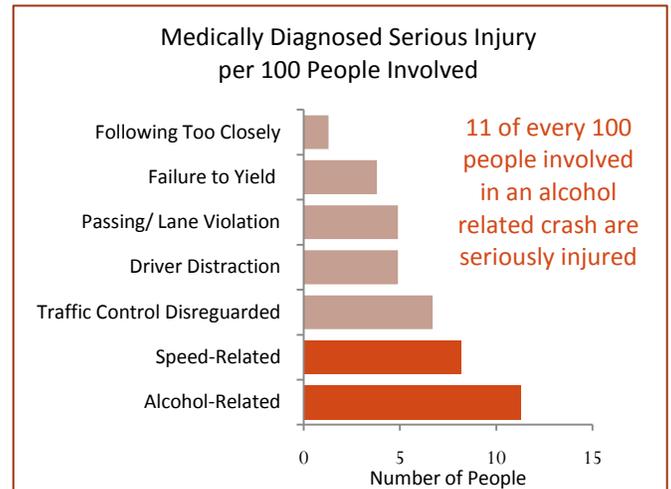

⇒ Highest total Hospital and ED charges in

St. Lawrence County were for:

→ Speeding

→ Failure to Yield Right of Way

→ Alcohol Related

Reducing risky behaviors on the road can save lives and prevent injuries – making St. Lawrence County a safer place to drive!
