

Motor Vehicle Traffic Injuries Tioga County Residents 2012-2014

The Concern

Motor Vehicle Traffic Injuries are the 3rd leading cause of injury related death in Tioga County. Traffic crash-related injuries are the 4th leading cause of injury related hospitalization and the 5th leading cause for injury related emergency department (ED) visits in Tioga County.

Traffic crash-related injuries are not accidents! They are not random, uncontrollable acts of fate, but occur in predictable patterns, with recognizable risk factors and among identifiable populations. A traffic crash-related injury is a predictable and preventable event!

Magnitude of the Crash Problem

- Every two **months**, because of a traffic crash, an average of:
 - 1 Tioga County resident(s) died
 - 3 Tioga County residents were hospitalized
 - 27 Tioga County residents were treated in an ED
- Annually, traffic crashes resulted in an average of:
 - \$936.5 Thousand in hospitalization charges
 - \$479.6 Thousand in ED charges

Traumatic Brain Injuries (TBIs) can result from traffic crashes and may result in the loss of independent function, requiring long-term care, and increased in life-long expenses.

- Among Tioga County Residents that were hospitalized following a traffic crash **35% were diagnosed with a TBI.**
- Bicyclists and motorcyclists who wear helmets reduce their risk of a TBI!
- The risk of TBI can be reduced by wearing your seat belt!

Who is at Risk for Crash-Related Injuries?

- Although most crash victims in Tioga County were vehicle occupants, **a higher percentage of bicyclists, pedestrians, and motorcyclists were injured severely enough to require hospitalization.**

In Tioga County:

- Although females have a higher rate of outpatient ED visits, males are more likely to have been hospitalized from a traffic crash.
- Traffic-related crash injuries can occur in all age groups.

Tioga County residents aged 20-24 had the highest rate of injuries treated in a hospital following a crash.
