

Good Afternoon,

New York is pleased to announce the submission of its application for Round 2 Model Test funding under the State Innovations Model funding opportunity announcement (FOA). On Friday, July 18, New York submitted its application with over 30 letters of support. Our application would not have been possible without the input and guidance of numerous stakeholders. Thank you for your support.

Attached you will find New York's submitted Project Narrative; this will also be posted to our DOH website. The proposal requirements and materials associated with this FOA can be accessed on CMMI's SIM webpage, found [here](#).

Applications were due to CMMI on July 21. Awards are to be announced in the fall, and the performance period would begin January 1, 2015.

Thank you for your continued support - we will continue to reach out for your input, suggestions and guidance. Questions and comments may be submitted to [SIM@health.state.ny.us](mailto:SIM@health.state.ny.us).

Sincerely,

The New York State SHIP Team
