

Partnership between Health Care Trade Organizations and NYSDOH Bureau of Vital Records

The New York State Department of Health (NYSDOH) Bureau of Vital Records has formed a partnership with three key health care trade organizations:

- Healthcare Association of New York State (HANYS)
- Greater New York Hospital Association (GNYHA)
- Iroquois Healthcare

These three trade groups offer resources, education, information, and advocacy for their participating members. The focus of the partnership with NYSDOH is to enhance information and outreach to health care providers statewide.

The four-way partnership was launched in early May 2017 with a co-hosted informational web conference about the Electronic Death Registration System (EDRS). The session was well-attended by about 200 members of HANYS, GNYHA, and Iroquois Healthcare.
